

WELCOMES YOU TO GRILLING WITH THE *SAPLING GRILL GRATES*

You've enjoyed your *Sapling Evaporator* and are ready to grill! Here's how to start:

Take your grill grates out of their box.

Remove the *Sapling Evaporator Pan* from your *Sapling Evaporator* and place the three grill grates on the barrel opening. Voila!

Reminder: Maintaining your *Sapling*

Simple routine maintenance will lengthen the life of your *Sapling*! Clean out some, but not all, of the ashes when the unit has cooled after each use. The best practice is to clean out the ash and/or sand and oil the inside of your barrel with vegetable or olive oil when not in use for extended periods of time, and, unless your *Sapling* can be stored in a garage or barn, you should cover it when not in use. Consider purchasing the *Sapling Grill Cover* for this purpose. If water gets in your barrel, be sure to dump it out, dry it out, and apply another layer of oil to discourage rust.

Expansion and contraction caused by heating, cooling and exposure to the elements may eventually cause some cracking, flaking or thinning in the paint on your *Sapling*. If you notice this, after the barrel has cooled, sand the area with 100 grit sandpaper and repaint with *Sapling Flat Black Paint*, or the equivalent.

Consider purchasing the *Sapling Care Kit*, which includes everything you need for maintaining the *Sapling Evaporator* and all its accessories!
