

WELCOMES YOU TO SUGARING WITH THE *Sapling Stack Cap*

The *Sapling Stack Cap* you've just received can be used to protect your *Sapling Stack* and *Evaporator* from the elements. You can use the *Sapling* normally while the *Sapling Stack Cap* is installed. The *Sapling Stack Cap* allows the smoke from your wood fire to escape while protecting from rain and snow.

Simply place the *Sapling Stack Cap* on the top of your stack. It should slide into the top of the stack and hold firm.
